

General Description

The MicroTesla Magnetic Field Effects Roll Test Box is specifically designed to power and test MicroTesla sensors and modules. It eliminates all transfer spreadsheets and their errors. One set of MicroTesla Magnetic Field Effects (MFE) roll test equipment and software is provided free of charge to our customers.

Features

- New, simplified graphical roll test screen, with updated instructions
- Display sensor information such as calibration date, calibration coefficients loaded, sensor serial number, etc.
- New early warning roll test failure alert
- Upload MFE calibration coefficients from sensor EEPROM or disk if required

MFE Test Box Package

- The MFE instrument Roll Test Box includes a built-in power supply
- Roll test software
- Communication and power cables supplied

Additional Equipment Needed

- Computer with Windows XP, 2000 or Vista
- Roll test stand or V Block or Probe Stands (Non-Magnetic)
- Magnetically clean roll test testing area
